ASSESSMENT DETAILS

The assessment for this module is 100% coursework and consists of two individual assessments. **Both assessments should be uploaded onto your individual account for this module.** Your lecturer will provide you with these details.

A penalty of 10% will be applied to an assessment which is submitted late, up to 1 week after the submission deadline. Thereafter the submission will be noted but will not be marked.

The Assessment Theme is based on London Olympics 2012 which applies to both assessments. For example, this could range from the countries which take part, the athletes, the various sporting activities, venues, results and/or something else relevant to the theme. You can use various sporting activities or you can focus on a specific sport in more detail.

Assessment 1

The first assessment is worth 30% and should be submitted by 11:59pm on the Friday of week 6. This assessment requires you to produce a web site which will consist of a number of html pages, including an index page, all of which should be uploaded to a folder called BXXXXXXXX_A1 within your individual student account on the University web server (replacing XXXXXXXX with your banner no).

These pages will include an introduction, working links and information on how you will consider design, usability, colour and accessibility in the web site for the second assessment. You are also expected to have two pages which outline the main home page and one of the detail pages for the second assessment. The layout should be different for these two pages.

The second assessment requires you to develop a usable, well presented, interactive web site based on the assessment theme.

Breakdown of Marks

Criteria	Marks

1) Assessment uploaded:
    a) Uploaded in student account
    b) Stored in folder with correct name
	3

2) Pages:
    a) Index page
    b) Links to other pages for parts 3, 4 and 5
    c) Two links to external web sites relevant to this module
	5

3) Introduction:
    a) Describe the purpose of the web site?
    b) Who is the target audience?
	4

4) Describe how you will consider each of the following in your web site:
    a) Design
    b) Usability
    c) Colour
    d) Accessibility
	8

5) HTML5 code of home page and detail pages:
    a) Sample code for the home page
    b) Sample code for one other page (this should be a different layout from the home page)
	10

Total	**30**
